Ethics: Aging, Driving, Sex, Research & Gambling

Most of us will never be part of an ethics committee, but we deal with ethical issues every day. Health care providers, family members, and guardians all need each other to address ethical issues inherent in the aging process.

Join us for a series of case studies dealing with ethical issues that we face in Skilled Nursing Facilities, Assisted Living Centers, Adult Day Care Centers, Independent Living Facilities, homes and churches.

You will find this to be an interesting presentation addressing many ethical, legal and financial issues that will continue to arise as our population ages.
